Step 3 – I login as useradmin and I can see company role created by Testadmin, demoadmin. It ok if Useradmin can see but the problem he can edit and delete. If useradmin does so than other Testadmin, demoadmin will have problem.

Similar thing can be done by other admin also, I need help on this. Request you to please share the right setting so that only admin of one company can view, edit and delete his own setting and not other admin. If admin has right not to make this public will help (For example Reports and can be made public or private).
